

**Most TPMs spend 70%  
of their time on work AI  
can now do in minutes.**

So I built **25 tools** to prove it.

## THE SETUP

# In two weeks, I built 25 Claude Code skills covering the full program management lifecycle.

From kickoff and capacity planning through escalation, retrospective, and root cause analysis.

---

The time savings were real.

**But the bigger shift was something else.**

# How I think about the TPM role

AI doesn't change the breakdown. It supercharges your impact within each layer.

70%

## EXECUTION

status · escalation · decisions · dependencies

AI compresses

20%

## COLLABORATION

alignment · facilitation · cross-functional leadership

AI amplifies

CROSS-CUTTING · **program-expert** (coaching) · **tpm-rockstar** (craft review)

# Setting programs up to win

## — ① INITIATING

- |                          |                                            |
|--------------------------|--------------------------------------------|
| • <b>kickoff</b>         | the 5 questions that make or break a start |
| • <b>stakeholder-map</b> | who needs what, when, and how              |
| • <b>business-case</b>   | the case that actually moves approvals     |
| • <b>capacity-plan</b>   | demand vs. availability, before overcommit |

## — ② PLANNING

- |                          |                                                    |
|--------------------------|----------------------------------------------------|
| • <b>workback</b>        | schedule built backward from the target date       |
| • <b>raid</b>            | living risks / assumptions / issues / dependencies |
| • <b>dependency-scan</b> | chains, circular deps, critical-path exposure      |
| • <b>premortem</b>       | surface failure modes before they happen           |
| • <b>offsite-plan</b>    | an agenda built around decisions, not talk         |

# Driving execution, surfacing risk

— ③ EXECUTING

|                              |                                                |
|------------------------------|------------------------------------------------|
| ● <b>status-update</b>       | exec-ready status from raw notes, in minutes   |
| ● <b>comms</b>               | one update, reframed for four audiences        |
| ● <b>decision</b>            | options, trade-offs, recommendation, rationale |
| ● <b>escalate</b>            | what changed, what it costs, the exact ask     |
| ● <b>prd-review</b>          | find gaps before the post-launch retro does    |
| ● <b>slack-formatting</b>    | the right structure for every message type     |
| ● <b>zoom-summary</b>        | decisions + owners + actions from a transcript |
| ● <b>multi-system-status</b> | portfolio-level rollups across tracks          |

— ④ MONITORING

|                               |                                             |
|-------------------------------|---------------------------------------------|
| ● <b>watchdog</b>             | early-warning signals before slips happen   |
| ● <b>roadmap-compare</b>      | what moved between two roadmap versions     |
| ● <b>live RAID</b>            | risk tracking that stays current, not stale |
| ● <b>live dependency-scan</b> | critical path, continuously checked         |

# Landing the program — and raising the craft

— ⑤ CLOSING

|                    |                                                |
|--------------------|------------------------------------------------|
| • retro            | honest reflection that ends in behavior change |
| • async-retro      | independent input, zero anchoring bias         |
| • rca              | root cause and learning, never blame           |
| • launch-readiness | a clean go / no-go against a checklist         |

— ♦ CROSS-CUTTING

|                  |                                               |
|------------------|-----------------------------------------------|
| • program-expert | coaching that builds judgment, not dependency |
| • tpm-rockstar   | periodic review of senior TPM craft           |

## THE RESULT

**2 wks**

to build the suite

**85%**

less reporting time

**5**

PMI groups covered

**The tools don't replace judgment.**  
**They reduce the tax on it.**
